AREA

STOP AIRPORT SPREAD

Build *Community* instead

THEY'RE TAKING OUR BUFFER! Wellington Airport wants to pave over the current green buffer (the Miramar Golf Course) that separates one of Wellington's poorest communities from their noisy, polluting activities.

THEY WANT MORE TAXIWAYS AND PARKING FOR PLANES so they can make more money, generate much more noise, and facilitate significantly more greenhouse gas emissions that they don't take responsibility for.

LINING THEIR POCKETS. Their expansion lines their pockets at the expense of surrounding communities and to the detriment of the environment.

Guardians Of The Bays **are fighting the Airport** in the Environment Court because we think their expansion simply lines the Airport's pockets at the expense of local communities and of the environment.

**WE NEED YOUR HELP AND
SUPPORT TO STOP THEM.**

WHO ARE WE?

Guardians of the Bays is dedicated to reducing the Airport's negative impacts on the surrounding communities of Strathmore Park, Miramar, Lyall Bay, Rongotai and Kilbirnie; and to safeguarding the environment from the Airport's purely profit-driven expansion.

The Airport's massive expansion plan (see image) shows just how obscenely out of scale this proposed development is compared to the communities that surround it.

We need your help and support to keep the Airport in check.

WE NEED YOUR SUPPORT

- **Visit www.GuardiansOfTheBays.org.nz** to find out about our fight for the environment and community.
- **Sign up for our newsletter** to keep informed about the actions we are taking.
- **Make a donation** to assist us in imposing legal conditions on the Airport's growth that they can't ignore. Scan this QR code or visit our website to find out how you can help. www.guardiansofthebays.org.nz/how-you-can-help/

WHAT ARE THE ISSUES?

- **More planes, more carbon.** The Airport's aim to double passenger numbers by 2040 undermines NZ's commitment to be carbon neutral by 2050; as well as the City Council's climate change mitigation plan.
- **Flawed forecasts.** The Airport's passenger "forecasts" used to justify their expansion fail to mention climate change effects, environmental impacts, or the effect of a long-running pandemic!
- **Green buffer gone** from the District Plan. The airport moves to the back door of Strathmore Park with increased noise, dust, visual disturbance, light and air pollution. There will be devastating health impacts on neighbours.
- **Inadequate construction information.** How will storm-water, earthworks, sediment, and dust from such a major construction be managed?
- **No traffic plans** to manage increased traffic congestion, and no guaranteed continuing access between Broadway and Moa Point.
